(54) SPEAKER DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a speaker device capable of preventing the decline of the stereophonic acoustic effect of a multi-channel reproducing system by reflecting reproducing sound to walls, a ceiling and a floor.

SOLUTION: For this speaker device, speaker units 1 are arranged linearly and planarly to a baffle plate 5, an attenuator 3 and a high-cut filter 2 are packaged to the respective speaker units 1, an input level is set so as to be increased as approaching the speaker unit 1 of a center part for the attenuator 3 and a cut-off frequency is set higher as approaching the speaker unit 1 of the center part for the high-cut filter 2.
